## Șelariu Alexandru | Front-End Web Developer

Telefon: 0724770142

Mail: [Selariu.Alexandru.mail@gmail.com](mailto:Selariu.Alexandru.mail@gmail.com)

IT enthusiast, mainly because you have the opportunity to learn and discover something new everyday. Currently I'm focusing on **front-end web development**, especially **JavaScript** and **React**.

### Skills

---

HTML 5

CSS 3

JavaScript

Bootstrap 4

Sass/less

React.js

Node.js

Redux.js

### Projects

---

1. **Movies [website](#)** where we get the latest movies from themoviedb API, you can search for your favorite movie and see a short description of the movie and all the actors and the IMDb rating.

- Used **React** to create components
- Utilize **fetch** to get the data in **JSON** format
- Implementing routes using **react-router-dom**

2. **Booking [website](#)**, where you can register a account. Create and edit your rentals and manage booking from other users or search and book rentals from other users.

- Website built using **React / Node / Express / MongoDB**
- Integrate login / register using **JSON Web Tokens**
- Styling in **SCSS**

3. **Workout [website](#)**, register as a member and add your workout routine, or just take a look at what other members routines looks like and chat with them on the comments section.

- Create API with **Node.js / Express**
- Testing routes using **Postman**
- Using **Bootstrap** for the front-end
- **Redux** for state management

4. **E-Commerce [website](#)**, sign in with your google account. Shop for favorite items and add them to card go to checkout and register payment options.

- Create website with **React**
- Back-end and authentication in **Firebase**
- Used **styled-components**

5. **Resume [website](#)** for developers. Create account add experience, education, projects you worked on, and meetups and workshops you attended. See other peoples resume and chat with them.

- Website built using **React Hooks / Redux / Node / Express / MongoDB**
- Protect passwords with **bcrypt.js**
- **Media Queries** for Responsive design

6. **Contacts [website](#)** where you can login and add your friends phone numbers and emails.

- Used **React Hooks** to create components
- State management using **React Context API**
- Connect to **MongoDB** with **Mongoose**

## Experience

---

**SC.Stânjenelul SRL (2011 – 2015)**

- Primary accounting
- Stock management
